BullZip PDF Printer Free [Mac/Win]

In PDF Importer you can add, subtract, edit or delete pages from a PDF file. Choose a template for each page. You can either define your own file structure or you can keep your PDF files organised automatically. The split functionality allows you to break your PDF file into separate files, which you can then import into your PDF software separately. More information about this program is available at: www.pdfimporter.net PDF Importer Features * Add or remove pages from a PDF document; * A certain number of pages, a single page, or a range of pages can be selected; * Specify a template for each page; * Select your own file structure; * Keep your PDF files organised automatically; * Split PDF documents into separate files which you can then import into your PDF software separately; * Fast search through the document; * Create PDF files from selected pages from your existing PDF documents; * Converts PDF files into a single file format as well as keep different versions of the same files on the same computer; * Set file info; * Import documents as PDF, TIFF, JPG, PCX, PDF/A, JPEG, JPG/C, JPG/E and GIF; * Convert PDF files into a single file as well as keep different versions of the same files on the same computer; * Import documents as XPS, X, PGZ, RTF and HTML; * Choose a template for each page in your document; * Keep PDF files organised automatically; * Keep all the notes, spelling checker, and symbols in your PDF documents; * Adjust your font size; * Specify an initial zoom level; * Choose an initial zoom level; * Convert PDF documents into a single file format as well as keep different versions of the same files on the same computer; * Specify a password, owner and user; * Set the password owner and user; * Automatically save the last opened file. PDF Importer is an effective PDF file converter that enables to add, subtract, edit or delete pages from a PDF document. Choose a template for each page. You can either define your own file structure or you can keep your PDF files organised automatically. PDF Importer Features * Add or remove pages from a PDF document; * A certain number of pages, a single page, or a range of pages can be selected; * Specify

BullZip PDF Printer For Windows

Easy PDF creation is what this app is all about. It creates portable PDF files from any type of document. It installs a virtual printer on your computer so that you can print to a PDF file. Even if the application is not open, it will continue to operate in the background. It provides instant PDF creation, without the need for Ghostscript. When installed, it adds a PDF printer to Windows' dialog as well as to the list of portables applications. The application also remembers the last folder and last file name. It has many options for getting PDF files to work best. These include copyright/disclaimer information, text watermarks, PDF file sizes, print quality and more. This application is also easy to use. Virtual printer installation Bullzip PDF Printer installs a virtual printer for use in Windows. The virtual printer must be opened in order to print to PDF files. Only when the virtual printer is opened, is the PDF printer able to print PDF files. The virtual printer also allows for the printing of any printable type, including DOC, XLS, PPT, IMG, PPS and PPTX. To add a virtual printer you need to install a version of GhostScript that supports the "PDF" print device. Intuitive interface Bullzip PDF Printer offers an intuitive interface. There are four general tabs for all of the functions: General, Document, Image, and Watermark. In the General tab you can set your security options, the PDF file name and the last file name. The Document tab offers parameters such as the document properties, the print quality, and the initial zoom level. The Image tab lets you set the device, horizontal and vertical resolution, the image type, the text size, the initial zoom level, the CMYK color profile, compression type, and the image compression setting. In the Watermark tab you can set the watermark's position, font, size, color, and layer. You can also customize the watermark's rotation, layer order, and color shift and color. Document tab The Document tab offers the following options: Author, Title, Subject, Keywords, Pages, and Notes. Image tab The Image tab offers the following options: Device, Horizontal and Vertical Resolution, Image Type, Compression Type, and Compression Level. Watermark tab The Watermark tab offers the following options: Position, Text, Size, Color, Font, Layer, and Rotation. Actions tab The Actions tab 09e8f5149f

BullZip PDF Printer is a program that creates PDF files from any application in Windows, without making any changes to the source documents. It offers a simple configuration wizard and does not require a specific Ghostscript library. Free PDF printer is a tool that sets up a virtual printer in Windows, in order to create PDF files from all types of documents. This way, it allows any application to create PDF files using just the print menu. During installation, it offers to download and install Ghostscript Lite, a third-party program that Free PDF printer needs in order to properly function. The user interface is standard, and the tabs are General, Dialogs, Document, Image, Watermark, Merge, Security as well as Actions. General configuration settings In the General section, you can copy or create a new option set, select the output format (PDF, BMP, EPS, JPEG, PCX, PNG, PS or TIFF) and specify its default name (optionally use displayed macros), append if output exists, confirm overwrite, as well as remember last folder and last file name. Metadata editing operations, watermarks, and other handy tools In Document, you can set the document properties of the generated file (author, title, subject, keywords), quality settings, PDF quality, initial zoom level, and compatibility level. The image section allows you to control the creation of an image file by configuring the device, horizontal and vertical resolution, and others. With Free PDF printer you can also stamp your document with a text watermark, and customize its font, color, size, outline width, layer, rotation, and position. Furthermore, you can merge and superimpose PDF documents, as well as set a password (owner and user) with customizable key length and permissions to increase the file security. Bottom line All in all, Free PDF printer works great and proves to be a truly good alternative for creating Portable Document Format files. Free PDF printer Description: Free PDF printer is a program that creates PDF files from any application in Windows, without making any changes to the source documents. It offers a simple configuration wizard and does not require a specific Ghostscript library. PDF PDF printer is a tool that sets up a virtual printer in Windows, in order to create PDF files from all types of documents. This way, it allows any application to create PDF files using just the print menu. During installation, it offers to download and

What's New in the?

Create professional-looking PDF files from almost any application on your system. PDFCompress is a free utility that will make the printing, converting, or faxing of your documents much simpler. You can print to PDF files from virtually any application, and for the most part, you can have them automatically merged with other PDF files as you print them. What makes this PDF printer stand out from the crowd? It offers a number of options, such as font embedding, document customizations, and watermark text. By "embedding" fonts, you can save file space without having to include any additional fonts in your printer or application. You can also customize the properties of your PDF document on a page by page basis, and if you have any special formatting information, you can send it as a watermark on the pages. This unique PDF utility features an easy-to-use user interface that gives you control over every aspect of how you print to PDF. There are two ways to use this printer, as explained in the HELP section of this user guide. The "classic" printing approach to printing to PDF lets you specify the start and end page, the page range to print, and the number of pages to print in one go. The "batch" printing option, on the other hand, lets you automatically print one or multiple PDF documents from any application without ever having to specify where they are located. To get started, install the driver for your printer (you'll find directions for that here: and then simply select the format from which you want to print a PDF document. You can print to a file, send it directly to a fax machine, or even scan one or more documents and have them be part of the PDF you create. What kind of documents can I create? Anything that can print is an option, but here are a few of the more common ones: • CD / DVD labels (requires an app like Nero or PowerBurn) • Anything you can print from Microsoft Word • Any tab or text file (print to word), spreadsheets, or graphics files • An existing PDF (ex: the second page of an existing PDF that you want to stamp a watermark to) • A file you have on your computer The possibilities are virtually endless! About How to download and install Print Driver for USB (above link) Support, trial or registration After

System Requirements For BullZip PDF Printer:

* USB ports available for user to install add-ons * 2GB RAM. * OS: Windows 7/8/8.1/10 (32/64 bit). * Graphics card: Intel HD 4000 or NVIDIA GeForce 500 Series (GPU). * Intel Core i5 or AMD Phenom II X4, 1.5GHz to 3GHz * USB 3.0 hard disk, 12GB free space to install * 3GB free space in C drive * 2GB free space in programs * Minimum
