Q: cout not working in c++  
I'm trying to learn c++ at the moment and I am running into a problem where I can't use cout in any of the projects I am using.

This is the code I have so far: #include "stdafx.h" #include using namespace std; void main() { int a = 0; int b = 0; int c = 0;

double e = 0.0; cout > a; cout > b; cout > c; e += (a + b + c); cout
