file format The AutoCAD file format is a binary file format that is designed to be compatible with other software that handles CAD data, such as AutoCAD, other drawing programs, cadence design review, print preview and other CAD applications. The file format is defined by the DGN format which is the native file format for Autodesk AutoCAD. XRef files XRef files were introduced with AutoCAD 2004, and are intended to be a replacement for the pre-existing ObjectARX file format. The internal file format of the AutoCAD family of products is DGN, which is an industry standard graphical language for 2D and 3D vector graphics. The DGN format was the predecessor of the standard SVG file format. The DGN format has evolved from two sources: The original source for the AutoCAD 1990 drawing format was ObjectARX, a company of Autodesk. Since AutoCAD 2005, Autodesk has released software that can convert to other formats, such as PDF and SVG, or export to AutoCAD formats, such as DGN, DWG, DXF, and DWF. Format specification Autodesk DGN files are binary files that store the geometry of shapes. DGN files are intended to be compatible with other software that handles CAD data, such as AutoCAD, other drawing programs, cadence design review, print preview, etc. They are usually smaller in size than other CAD formats, such as DWG, DXF, and DWF, and are compatible with many software applications.
